

343C1 User Calibrated Dual K-type Digital Thermometer

Multi Purpose and High Temperature capability - by TPI

- / For HVAC/R, food and thermal applications
- / User calibrated and water resistant
- / Rugged, reliable, accurate and affordable

The TPI 343C1 User Calibrated Digital Thermometer is an extremely versatile tool designed for routine and high temperature use. It measures temperatures from -50 to 1350°C.

Dual K-Type thermocouple ports enable the 343C1 to display temperature differentials between readings.

Test Products International (TPI) are one of the world's leading designers and manufacturers of digital handheld test equipment, measuring instruments, food safety equipment, field instruments and digital tools.

FEATURES

- > Water Resistant
- > Selectable °C and °F ranges
- > Selectable input and display Mode (T1 - T2)
- > Auto Ranging and Auto Power Off
- > Records and displays minimum and maximum temperatures
- > On/Off button with accidental engagement guard
- > Hold button to freeze display
- > Four digit 4,000 count display
- > Easily calibrated with a glass of iced water
- > 3 year limited warranty

STANDARD ACCESSORIES

- > Thermocouple Temperature Lead x2
- > Protective Boot with Tilt Stand
- > Soft Pouch

OPTIONAL ACCESSORIES

- > TPI produce a range of different temperature probes to suit various applications from immersion, contact, air temperature, food processing and clamp on.

TECHNICAL SPECIFICATIONS

- > Operating Temperature 0 to 50°C
- > Storage Temperature -25 to 70°C
- > Range
 - > Accuracy
- 50° to 0°C ±1.6°C
- 0 to 600°C ±0.3% of reading + 1°C
- 600 to 1350°C ±0.4% of reading + 1°C
